## **2. Full Year Announcement**

### **2.1 Media Release**

#### **Monday, 9 August 2004**

Bendigo Bank today announced a 2003/2004 operating profit after tax and specific items of \$79.8 million, an increase of 35.3 per cent on the previous year.

Excluding specific items – primarily the sale of Cashcard Australia Limited shares in April – the normalised profit was \$73.2 million, a 24.1 per cent increase.

Earnings per share increased by 13.4 cents, or 28.5 per cent, to 60.2 cents (normalised 55.2 cents). The final dividend increases by 3.0 cents to 23.0 cents, payable on 30 September. The total dividend for the year is up by 6.5 cents, to 40 cents per share fully franked, a 19.4 per cent rise. The payout ratio is 65 per cent (71 per cent on normalised profit).

Chairman Richard Guy said the result confirmed the Bank's earnings momentum. "Even excluding the Cashcard shares sale, this year's result reflected the ongoing improvement in revenue, profitability and performance in line with solid growth across the Group.

"We are seeing the results of our consistent and unique strategy – to grow our capacity to help our customers achieve their goals and to improve the prospects of our communities," Mr Guy said.

"Today's result is a significant one for Bendigo Bank because it clearly shows that the investment program undertaken to support this strategy over the years is paying off with earnings progression.

"During the past three years our profit has more than doubled and normalised return on equity has grown from nine per cent to almost 12 in line with our stated aim to grow it by about one per cent per annum.

"Shareholders who have supported our customer and community focus are now being rewarded with consistently strong growth in earnings and the prospect of further improvement as our branch network matures and our newer businesses gain momentum," Mr Guy said.

He said progression would continue as Bendigo enters its 10<sup>th</sup> year as a bank.

"We have opened 100 new branches in the past three years and demand for our brand tells us that they will continue to grow rapidly for some time yet, augmenting the continued steady growth in our mature branches.

"And investment hasn't stopped, with a further 30 Community Bank branches to open this financial year and new company owned branches for the NSW regional towns of Coffs Harbor, Port Macquarie and Griffith.

"Overall our results indicate that we are achieving our aim of positioning the company to generate fair and sustainable returns for shareholders through delivering on our commitment to customers and communities across Australia.

"A good proportion of the communities that have joined our Community Bank<sup>®</sup> program are generating good returns and are reinvesting money into local development and payment of local dividends. That is essential to our long-term prospects because successful customers and successful communities create a successful bank, and in that order."

Detailing the normalised result, which is subject to audit, managing director Rob Hunt said operating profit before tax and specific items was \$106.6 million, breaking through \$100 million for the first time in the Company's history.

Total Group deposits grew by 23 per cent to \$10.2 billion, the first time the Company has exceeded the \$10 billion mark in deposits.

Retail deposits increased by \$1.5 billion. The ratio of retail deposits to total deposits remains high at 90.1 per cent, down slightly from 92.5 per cent. Funds managed by subsidiary Sandhurst Trustees grew by \$425 million, to \$2.2 billion.

"Our Wealth Solutions division, of which Sandhurst is the linchpin, grew its profit contribution by 80 per cent," Mr Hunt said. "We also saw excellent growth in the contributions from Community Bank and from our joint venture bank Elders Rural Bank."

Mr Hunt said the cost-to-income ratio had decreased to 69.4 per cent (normalised). "This is trending in the right direction, but we feel it is important to maintain a healthy investment program while demand for the Bendigo brand continues to run so strongly and there is clear prospect of generating increasing revenues."

Mr Hunt said the consistent strategy during the past 10 years was paying dividends with four consecutive years of strong earnings growth. "Bendigo Bank's strategy is based on its strengths as a community based financial institution with a strong service culture.

“Australians have a healthy respect for those qualities and we have developed distribution strategies that enable us to reach more communities without getting ahead of our capacity to deliver the brand experience. This is evidenced by our extremely strong showings in independent customer satisfaction and reputation surveys.

“This measured approach has delivered excellent growth in customer numbers and business, which has translated into strongly improving performance as our branch and electronic networks mature and grow their customer bases.

“And because we have expensed these investments, our balance sheet is not encumbered by past expansion activities, positioning us to take advantage of future opportunities and enabling us to invest in initiatives to continue to build our relevance and new revenues.

“Today, there are 276 communities throughout Australia which carry the Bendigo Bank name and a net 88,000 new customers opened accounts with the bank in 2003/2004.

“We plan to open a further 33 new branches this year and we will continue to expand our Wealth Solutions, e-bank and payment card options, all of which have the capacity to further grow revenue.”

“We are, however, conscious of where we are in the economic cycle. We are cautious about the future environment and we have positioned the business accordingly, having largely paid for development of our distribution business and strategic initiatives. Nonetheless, we still expect to deliver growth above the banking industry average and to generate improvement in normalised earnings by 15 to 18 per cent depending on market conditions.”

## **2.4 Additional notes**

### **2.4.1 Changes in Accounting Policies**

The accounting policies adopted are consistent with those of the previous financial year.

### **2.4.2 Adoption of Australian Equivalents to International Financial Reporting Standards**

The Australian Accounting Standards Board (AASB) is implementing the Financial Reporting Council's policy of adopting the International Financial Reporting Standards (IFRS), which will apply to the group's reporting periods from 1 July 2005.

Adoption of IFRS in 2005 is expected to have significant impacts on the accounting policies of Australian reporting entities and their reported financial position and financial performance.

Bendigo Bank commenced a project in December 2002 to assess the implications of the adoption of IFRS for accounting policies, reported performance and position of the group. As part of this project, Bendigo Bank has formed an IAS Conversion Team (ICT) to undertake assessment of impacts, implementation of necessary changes to accounting policies, modifications to accounting systems and communication to stakeholders.

The ICT regularly reports to the company Audit Committee on project progress, findings, impacts and identified changes required to group accounting policies, systems and procedures to ensure transition.

Key areas of the bank's reported performance and position that are likely to be affected by the adoption of IFRS are:

#### **Goodwill**

Initial impact on retained earnings at 1 July 2004  
Lower expenses  
Volatility in results in the event of impairment

There will no longer be a requirement to amortise goodwill arising in a business combination. Goodwill is instead subject to impairment testing at least annually, using new methodology. The new testing methodology may result in assessment of impairment for some goodwill and require initial write down on transition to IFRS.

#### **Financial Instruments**

Volatility in future earnings for those instruments that are to be measured at fair value

Financial instruments will be required to be classified into five categories, which will determine the accounting treatment of the item. This will result in a change to the current accounting policy that does not classify financial instruments into these categories. Some instruments currently carried at amortised cost will in future be carried at fair value, with fair value changes either charged to profit and loss or taken to equity, depending on their classification. The future financial effect of this change is not yet known as the classification and measurement process has not yet been fully completed.

## **2.4.2 Adoption of Australian Equivalents to International Financial Reporting Standards cont'd...**

### **Derivatives**

Volatility in future earnings

All derivative contracts will be recorded at fair value. When derivatives meet the new criteria for recognition as a hedge, movements in fair value will be taken to equity. Derivatives not meeting the criteria will have such movements taken to profit and loss. Also, all hedges will require effectiveness testing, with any ineffectiveness taken to profit and loss. It is expected that the majority of our derivatives will meet the criteria for hedging.

### **Loan provisioning**

Initial impact on retained earnings at 1 July 2004  
Volatility in future earnings

Estimated losses on impaired loans are to be discounted to their present value. As the discount unwinds, there is a resulting recognition of interest in the statement of financial performance during the period between recognition of impairment and recovery of the written down amount. Currently, the bank does not discount the cash flows associated with impaired loans when assessing potential losses, so it is anticipated that the level of provisioning will increase, thereby reducing reported profits.

Increases or decreases in general provisions created to comply with "local circumstances or legislation" are to be recognised as appropriations of retained earnings. This may have the effect of decreasing charges to profit for increases or decreases in general provision.

### **Securitisation**

New assets/liabilities recognised

Securitisations undertaken have been reviewed to ensure they meet the de-recognition requirements of IFRS. It is possible that one program undertaken may not meet these requirements, resulting in re-recognition of these assets. The value of these assets is not material to the group.

### **Taxation**

New assets/liabilities recognised

A "balance sheet" approach will be adopted, replacing the "statement of financial performance" approach currently used in Australia. This method recognises deferred tax balances when there is a difference between the carrying value of an asset or liability, and its tax base. It is expected that the standard may require the group to carry higher levels of deferred tax assets and liabilities, including a deferred tax liability in relation to the asset revaluation reserve.

At this stage the company has not been able to quantify the final impacts on future financial reports. Bendigo Bank will continue to place a high priority on this project and will include reference to the impacts in future reporting.

### 2.4.3 Dividends

|  | <u>45.8</u> | <u>36.1</u> |

All dividends paid were fully franked. Proposed dividends will be fully franked out of existing franking credits or out of franking credits arising from payment of income tax provided for in the financial statements for the year ended 30 June 2004.

#### **Dividend franking account**

Balance of franking account adjusted for franking credits which will arise from the payment of income tax provided for in the financial report, and after deducting franking credits to be used in payment of the final dividend.

|  | <u>51.0</u> | <u>35.6</u> |
|--|-------------|-------------|

The tax rate at which dividends have been franked is 30% (2003: 30%).  
Dividends proposed will be franked at the rate of 30%.

#### **Dividend paid**

Dividends paid by cash or satisfied by the issue of shares under the dividend reinvestment plan during the year were as follows:

|                              |             |             |
|------------------------------|-------------|-------------|

| Satisfied by issue of shares | 17.1        | 12.7        |
|                              | <u>45.8</u> | <u>36.1</u> |

#### **Dividend Reinvestment Plan**

The Dividend Reinvestment Plan provides shareholders with the opportunity of converting their entitlement to a dividend into new shares. The issue price of the shares is equal to the average closing price of Bendigo Bank shares traded on the Australian Stock Exchange over the five trading days up to and including the Record Date less a discount of 2.5%. Shares issued under this Plan rank equally with all other ordinary shares.

#### **Bonus Share Scheme**

The Bonus Share Scheme provides shareholders with the opportunity to elect to receive a number of bonus shares issued for no consideration instead of receiving a dividend. The issue price of the shares is equal to the average closing price of Bendigo Bank shares traded on the Australian Stock Exchange over the five trading days up to and including the Record Date less a discount of 2.5%. Shares issued under this scheme rank equally with all other ordinary shares.

The last date of the receipt of an election notice for participating in either the Dividend Reinvestment Plan or Bonus Share Scheme for the 2004 final dividend is 15 September 2004.

**Elders Rural Bank Ltd** after-tax profit of \$21.8 million represented an increase of 15% when compared with 2003 and is its fifth successive increase in annual profit. Elders continues to receive outstanding support and acceptance in both rural Australia as well as regional and metropolitan regions. Elders products and services are now available from more than 500 Elders, Bendigo Bank and Bendigo Community Bank® branches. Bendigo Bank retains a 50% interest in this entity.

**Tasmanian Banking Services Ltd** is a joint venture between Bendigo Bank and Tasmanian Perpetual Trustees providing banking services in Tasmania. Launched in November 2000, there are now seven offices holding in excess of \$370 million in banking business and the company is consistently recording monthly operating surpluses.

**Community Sector Enterprises Pty Ltd** was launched in July 2002. Community Sector Enterprises is a joint venture between the Bank and Community 21 Ltd, which represents 19 not-for-profit sector bodies. Based on the Community Bank model, it delivers banking services to the not-for-profit sector in return for a share of the margin and fee income. This improves the return on capital for the sector, enhancing its ability to deliver services to the community. In line with Bendigo's strategy to bank discrete communities, it provides the Bank with a distribution channel providing access to a geographically diverse community of interest. The joint venture has recently recorded its first monthly operating surplus.

**BSX Group Holdings Ltd** is the holding company of Bendigo Stock Exchange Limited (BSX). The BSX was established during the 1860's as a direct result of the gold rush. The rebirth of the BSX began in 1997 and it is now one of four approved stock exchanges in Australia. The reconstituted BSX was granted an Australian Market Licence by the Federal Government. This licence was most recently varied on 13 May 2004 to provide for new compensation arrangements.

BSX aims to operate a range of specialist markets, particularly emerging enterprises and rural and regional companies. It offers its services to provide growth solutions for emerging businesses, particularly rural and regional enterprises. BSX has recently appointed a new Chief Executive Officer and completed a successful capital raising.

### 2.4.6 Capital Adequacy

The Australian Prudential Regulation Authority (APRA) guidelines require capital to be allocated against credit and market risks. Banks must maintain a ratio of qualifying capital (comprising Tier 1 and Tier 2 capital), to risk weighted assets, and off-balance sheet exposures determined on a risk weighted basis, of which at least half must be Tier 1 capital. The Bank adopted the 'standard model' approach prescribed by APRA to measure market risk. The resultant capital after applying a numeric conversion factor, forms part of risk-weighted assets.

On 2 February 2004, Fitch Ratings, the international ratings agency, announced an upgrade of Bendigo Bank's long term rating from BBB to BBB+.

Fitch cited "Bendigo's strong commitment to relationship banking as providing a solid platform for growth, improved financial performance and maintenance of capital ratios as positive developments enhancing the bank's credit worthiness."

On 18 March 2004, Standard & Poor's Ratings Services revised the rating outlook on Bendigo Bank to positive from stable, and at the same time, affirmed the 'BBB' long-term and 'A-2' short-term counterparty credit ratings.

The outlook revision to positive reflects Standard & Poor's view that Bendigo is steadily transitioning into a larger, stronger, more diversified institution.

### Net Interest Margin

%

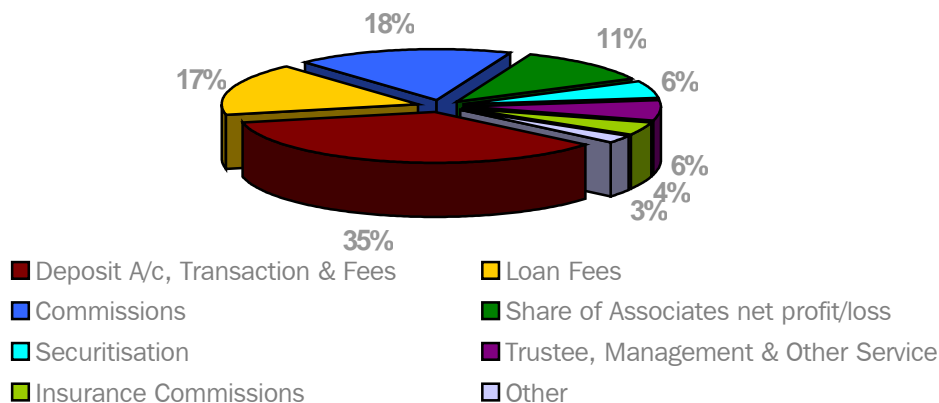

**Net interest income** increased by 14% when compared with the previous year. This was driven by an increase of \$1.7 billion, or 22% in average interest earning assets. The increase in net interest income was impacted by an 18 basis point decline in net interest margin. Interest income is reported net of margin share paid to Community Banks and other alliance partners.

## 2.5.2 Income cont'd...

### Other Income

**Share of associate's profit** has increased by 22% due to an increased contribution from Elders Rural Bank and profit contributions from Tasmanian Banking Services.

**Fees-asset products** increased by 14% driven by the record levels of lending achieved during the year.

**Fees-liability products & other** increased by 17% due to increased net transaction fees on customer accounts and increases in fee income from our electronic network.

**Commissions-other** increased by 25% due to increased earnings from our Wealth Solutions division, including commissions from managed fund products and financial planning activities.

**Securitisation** income declined by 27% due to the run-off in securitisation portfolios, which declined by 21% over the year. No new securitisation programs were undertaken in the current year.

### Efficiency Ratio - Operating Expenses/Total Income

%

### *2.5.5 Productivity & Expenses cont'd...*

**Staff and related costs** increased by 14% compared to the previous year. The increase follows the increase in full time equivalent staff numbers by 203. The majority of the increases were in our retail division, reflecting the growth in business volumes and expansion of the delivery network. Wage increases awarded under the group's certified agreement and other salary increases also contributed to the increase in this category.

**Fees and commissions** increased by 30% predominantly due to an increase in Community Bank branches' market development activities. The increase reflects the growth in Community Banks and the expansion of this delivery network. Commissions paid to our agency network also contributed to the increase in this expense category.

**Administration** expenses increased by 13%. Major contributors to this increase were product & delivery services costs, which includes the costs of delivering branch cash, ATM & Eftpos services and the Rewards program. Communications, postage and stationery costs also contributed to the increase in this category. Administration expenses were impacted this year by the significant external costs of implementing the requirements of the Financial Services Reform Act (FSRA).

The 2003 reversal of the prior year final dividend provision against opening retained earnings was made in accordance with the transitional arrangements under AASB 1044 "Provisions, Contingent liabilities and Contingent assets".

The 2003 adjustment to opening retained profits re revised AASB 1028 "Employee Benefits" is made in accordance with the transitional arrangements of that standard. The adjustment is due to a re-assessment of annual leave provisions at 30 June 2002 and related on-costs calculated in accordance with the revised accounting standard.

In 2003, the balances of a number of reserves were transferred to retained profits, as the reasons for maintaining these separate reserves was redundant.

The dividend paid value excludes those shareholders that have elected to take bonus shares in lieu of dividends.

## **2.6 Commentary**

### *2.6.1 Commentary on results for the period*

Group net profit attributable to members was \$79.8 million, a \$20.8 million or 35% increase over the \$59.0 million achieved in 2003. This result included the effect of several specific items of income and expense, with the normalised result being \$73.2 million, a \$14.2 million or 24% increase over 2003.

The result flowed from good contributions from all divisions within the Group, with the Retail Division, Business Banking, Community Bank, Wealth Solutions and associated companies all showing strong results. Record lending approvals, a 17% increase in Group managed assets and a 24% growth in managed funds contributed to the increase in profit.

Profit before tax increased by 29% from \$89.3 million to \$115.3 million, whilst the result before tax and specific items (normalised) increased from \$89.3 million to \$106.6 million, a 19% increase over 2003. Specific items included the profit on sale of Cashcard shares and properties and a GST refund in relation to our electronic network transactions.

Net interest income increased by 14% or \$31.3 million, driven by an increase of \$1.7 billion in average earning assets. The increase was impacted by an 18 basis point decline in net interest rate margin when compared with 2003.

Other income from ordinary activities increased by \$14.9 or 12% excluding the specific income items. The major increases included the share of associate company profits, which resulted from improved results for Elders Rural Bank and Tasmanian Banking Services. Fees from asset products, liability product transaction fees and income from our electronic delivery network also increased in 2004. Earnings from our Wealth Solutions managed funds and financial planning activities contributed to the increased income.

Bad and doubtful debts expense decreased by \$1.4 million to \$14.1 million. The general provision increase was \$1.6 million greater than last year to reflect the growth in assets and maintain the ratio of the general provision to risk-weighted assets at 0.79%. The expense in relation to specific provisions decreased by \$3.1 million, reflecting the general improvement in impaired assets.

Other expenses relating to ordinary activities excluding specific expense items increased by \$30.4 million or 12%. The major contributors to this increase were:

- Staff and related costs increased by 14% following the increase in full time equivalent staff numbers by 203. The majority of the staff increases were in our retail division, reflecting the growth in business volumes and expansion of the delivery network. Wage increases awarded under the Group's certified agreement and other salary increases also contributed to the increase in the category.
- Fees and commissions increased by 30% predominantly due to Community Bank branches' market development activities. This increase reflects the growth in Community Banks and the expansion of this delivery network. Commissions paid to our agency network also contributed to the increase.
- Administration expenses increased by 13%. Major contributors to this increase were product & delivery services costs, which includes the costs of delivering branch cash, ATM & Eftpos services and the Rewards program. Administration expenses were impacted by the significant external costs of implementing the requirements of the Financial Services Reform Act (FSRA).

### *2.6.1 Commentary on results for the period cont'd...*

The operating expense to income ratio decreased from 69.9% to 68.6% (69.4% normalised).

The directors declared a dividend of 23.0 cents per share, fully franked (at 30 per cent) on 9 August 2004. The final dividend is payable on 30 September 2004 and when combined with the interim dividend of 17.0 cents represents a dividend pay-out ratio for the financial year of 65% (71% on normalised profits) (2003: 68%).

### *2.6.2 Business activities and performance trends*

The major business divisions of the Group contributed to the solid result reported for the period under review. During the year, the network was expanded through the addition of 29 Community Banks. The Group has again achieved strong business growth as evidenced by record lending approvals of \$6.1 billion, growth in loan outstanding balances of \$1.9 billion (a 25% increase) and an increase in retail deposits of \$1.5 billion (20%).

Community Banking division after tax contribution increased from \$8.4 million to \$13.6 million – a 62% improvement.

Wealth Solutions division continued the trend from last year by increasing the contribution by 80% from \$7.6 million to \$13.7 million, flowing from strong growth in managed fund income.

A solid increase in profit contribution from Elders Rural Bank Limited and increased profitability of Tasmanian Banking Services ensured that the total associated companies' contributions increased from \$9.0 million to \$10.7 million in 2004.

These results are in line with the predictions made in 2003 and we expect further improvement in the contribution from all divisions in 2005. The ongoing expansion of our Community Bank network, further growth in the Wealth Solutions division and increased business in our retail, e-banking and business banking products will bring a further increase in profit in the new financial year.
